

Crest Front Mount Seat

Crest Front Mount Seat

The CREST is a high quality seat with a steel frame and padded fabric inserts. The modern styled, ergonomic seat shell provides a high level of comfort and durability, designed and developed for use in retractable platform seating applications. The CREST is a functional choice for educational precincts and indoor sporting arenas.

The CREST base is fixed; the back is manually raised by the user and automatically closed when retracting the platform to the stored position.

The CREST is available in 460 mm width and is individually mounted on the platform allowing seat centres to be set 480mm - 520mm.

The CREST has backrests and bases manufactured from heavy duty poly-ethylene (HDPE) and are available in a choice of 16 modern colours. The padded fabric inserts use 60kg/m grade foam and commercial grade fabrics that can be customised to suit your school, club or existing décor.
